

Numbering of types:

Putzel's and Visser's numbering will be used for different date-stamp types. While this will sometimes look a bit odd, since this catalogue lists date-stamps in chronological order according to first reported dates of use while Putzel's and Visser's numbering is not necessarily in chronological order, this will spare collectors the confusion of yet another numbering system, and make it easier to reorder this catalogue when new information changes the order of known first use of different date-stamp types.
