

#### 4 – MAP SHOWING LOCATION OF POST OFFICES AND PLACES

In fig 4 a map is given with a grid reference to indicate the approximate position of places and post offices mentioned in this handbook. In this Postmark Chapter, each office shows the grid reference so its location can be ascertained in fig 4. The map dates from about the year 2000, to which have been added any names which were not shown, so whilst it is not correct from a historical perspective, it is reasonably correct geographically. The location of telephone offices Lukubu, Malumeni, Mpongozini and Mtagozini could not be ascertained and are therefore not shown. Where place name changes were significant, the previous name has been shown in brackets.
